

AJAYSAAGAR

Game Development Instructor & Technical Content Lead

+91 63857-76502 • ajaysaagar.dev@gmail.com • [linkedin.com/in/ajaysaagar](https://www.linkedin.com/in/ajaysaagar) • github.com/ajaysaagar-dev • Chidambaram, Tamil Nadu, India

SUMMARY

Game Developer and workshop instructor with hands-on Unity/C# and Unreal Engine 5 experience. Taught game development workshops with structured, beginner-to-advanced lessons, and written clear technical remediation guides for non-specialist teams. Currently Lead Developer on an original Unity title and founder of an indie studio, so teaching examples come from real production work. Organized and self-driven, comfortable owning a project as the technical point of contact.

RELEVANT SKILLS

Game Engines: Unity 6 (C#, gameplay systems, project structuring) · Unreal Engine 5 (Blueprint, Material Editor, Sequencer)

Teaching & Content: Curriculum/workshop design, technical writing, structured remediation guidance, audience-facing explanation of technical concepts

Art, Audio & Pipeline: Blender · Substance Painter · SpeedTree · MetaHuman · MakeHuman · Character Creator 5 · iZotope RX · Ableton · Cubase

Programming & Tools: C++ · C# · Python · Git/GitHub · Unity Version Control · Figma

TEACHING & TECHNICAL CONTENT EXPERIENCE

Workshop Instructor — Independent 2023 – 2026

- Taught game development workshops for students, from engine fundamentals to project structure, beginner to intermediate.
- Broke down technical topics into step-by-step material students could follow on their own.

Assistant Analyst, Web App Security — Thread Assessment and Security Consortium 01/2024 – 02/2026

- Wrote file- and line-level remediation guides for security findings, so non-specialist teams could act on them directly.

GAME DEVELOPMENT EXPERIENCE

Lead Developer — Unknown 13 — Red Moros Studios 2026 – Present

- Leading development of Unknown 13, a first-person psychological horror-thriller in Unity, hands-on with gameplay systems and project structuring.

Founder — Red Moros Studios 2025 – 2026

- Run an independent game studio covering design, environment art, and sound; preparing to showcase work at IGDC 2026.

Game Developer — Freelancing 2023 – 2025

- Delivered independent game design, environment art, and sound work across client and personal projects.

PROJECTS

ThirdPerson-Shooter-System (UE5) — Third-person shooter mechanics system. [Link](#)

Virtual-Controller-UE5-Unity6 — Facial- and hand-motion gameplay in UE5 and Unity 6 from webcam motion tracking. [Link](#)

Vegetation System (UE5) — Procedural vegetation system for Unreal Engine 5 environments, built with SpeedTree. [Link](#)

Game-Lighting (Unity 3D) — Real-time lighting design and mood-building for game environments in Unity 3D. [Link](#)

ADDITIONAL EXPERIENCE

Full-Stack Developer — Alphaes AI (05/2026–Present): Full-stack development on a Next.js project management platform.

Full-Stack Developer & IoT Engineer — Veerana R&D Innovations (01/2026–09/2026): Designed a multi-tenant database schema for a fleet-tracking system.

EDUCATION

B.Tech in Artificial Intelligence & Data Science *CGPA: 8.44/10*

2023 – 2027

Sengunthar Engineering College, Namakkal, Tamil Nadu

SOFT SKILLS

Mentoring/Teaching · Problem Solving · Technical Communication · Self-Driven · Cross-Team Coordination · Attention to Detail
